Announcing an Interactive Collaborative Workshop for Environmental and Natural Resource Training Professionals

Thursday June 28, 2007
8am – 4pm

University of New Hampshire
Morse Hall, Room 401
Lunch Provided

Workshop Format:
This is a hands-on workshop designed to introduce training professionals to newly developed tools for enhanced data access, visualization and analysis. Participants are encouraged to bring their own laptops as links to online data and tool sites can be automated.

Topics to Include:
- The state of online, real-time data (Introduction)
- Exploration of large scale patterns of land use in the Gulf of Maine region.
- Retrieval, analysis and display of climate data for site specific use.
- Innovative tools for creating customized reports and newsletters.
- Tool critique and evaluation

The UNH Earth Systems Data Collaborative’s mission is to enable improved access to a wide variety of environmental information via the web. This workshop is the first in a series designed to present new tools for online retrieving, using and reporting of environmental data commonly used by managers and decision makers working within Coastal Watersheds.

To register for the workshop contact Alison Magill, ESDC Associate Director at alison.magill@unh.edu or call 603 862-4098 for more information.
